

ÁTNÉZETI

The diagram shows a stylized building facade with three windows. Window D 1 is a large, rectangular window on the right side of the facade. Window D 2 is a smaller, rectangular window on the left side of the facade. Window D 3 is a small, rectangular window located between D 2 and D 1. The windows are represented by white rectangles with black outlines and labels. The building facade is represented by a gray area with a dashed border. The windows are arranged in a way that suggests they are part of a larger architectural structure.
